## FOREWORD

**W**ITH the distribution of this Catalogue (No. 6) all previous issues are cancelled and new samples and prices will be sent immediately requested.

We have now entered our sixteenth year and our business has increased so rapidly that we find it hard to keep equal with the pace.

Since our last catalogue was issued it has been necessary to increase our factory space and an altogether new branch factory has been opened in Hull, Que., across the river from our main factory in Ottawa, Ont. This new addition opens up another large population to draw operators from which helps greatly to decrease overhead costs.

We solicit your business whether the order be large or small and guarantee perfect satisfaction always.

Only the finest and best duck "Repellant Brand" is used in the manufacturing of our world famous tents. Lumbering and Railroad Contractors will find our prices to suit their needs while Camping Parties and others will enjoy doing business with us because of the dependable information born of personal experience by our own staff in the living of this sort of life, all of which is at your disposal at no extra charge.

## G.-H.-G. Standard Ducks

**Repellant Brand Duck** is made from the choicest cotton procurable. There is no adulteration or sizing whatsoever used in its manufacture. In using Repellant Brand, you can rest assured you are getting the best that money can buy. Below we show the way the cotton is twisted and doubled in both warp and weft. This twisting more than trebles the strength of the fibre. All Repllant Brand Duck has from two threads up according to the weight per yard all tightly twisted together which makes it the strongest duck on the market. The illustration below fully explains this Insist on having Repellant Brand.

**Champion Brand Duck** is also made from the best staple cotton but it is only a single warp and weft and although it gives good satisfaction for ordinary use it has not got the same strength as the Repellant Brand. See illustration below as to how it is made and compare the two brands.

**Thistle Brand Scotch Paulin Cloth** is made of pure number one flax. For wearing qualities it has no equal. It is also treated with a water repellent process which makes it absolutely waterproof. The above three grades of cloth give you the choicest articles manufactured each in their own class. There is none better and they have few equals.

## Repellant Brand House Tent

Style 12

**Sizes up to 24' long have outside ridge pole.**

These tents are used extensively by railroad contractors. They are a style that is continually being improved which enables us to give the purchaser the best possible value. Grommets are used at the bottom of the wall for picket ropes and in the door for door ropes. All three tucks at ridge and eaves have ropes sewn in. These ropes are hand tacked at each end of tuck at end of tent. Tents 16½ ft. and longer have rope sewn in hem at bottom of walls where grommets for picket ropes are inserted.

Tents water and mildew proofed, add 25% to 35%.

For description of Repellant Brand Duck, see page 6; Repellant Brand Flys, see page 13.

The above cut shows a fly in use over tent for camping purposes, assuring comfort in camping during the warm summer days. For protection from rain, a fly is really required. Champion Brand flys are not as durable as Repellant, but answer the purpose very satisfactorily when they are only required for a short time. See page 6 for description of Champion and Repellant Brand ducks. For Repellant flys see page 13.

Our Stable Tents are finished by skilled mechanics. All points of strain are strongly reinforced with heavy rope hand-sewed pole holes reinforced with leather. Bottom of tent is reinforced with rope. Walls are fitted with tie rope for tying up. Leading contractors recognize "G.H.G." Stable Tents to be superior in make and finish. These tents are made from three grades of material: Champion Brand Duck; Repellant Brand Duck; and Thistle Brand Flax Waterproof Canvas. For description of these materials see page 6.

These tents are especially adapted to the western climate, being especially made to stand the heavy wind storms. They are extra heavily reinforced and have sewn gable ropes every 7' on the roof. All pole holes are faced with heavy leather including pole holes at eaves where wall poles are inserted. Only the best grade of rope is used in these tents and an eye is formed at the end of each gable rope. The guy is then fastened to this eye, which makes it easy to replace when broken. The strength of these tents has been severely tested and has always stood the strain. They are highly recommended by the largest railway contractors in Canada. The extra cost of these tents is a mere trifle when you consider the extra wear you get out of them. Made up in three different grades: Champion and Repellant Brand Ducks; and Thistle Brand Flax Waterproof Cloth. For description of these materials see page 6.

The above tents are finished in the same manner as Repellant Brand. The difference in the price being the difference in the quality of the duck used. For a permanent camp we recommend Repellant Brand, but for ordinary purposes this grade makes an ideal tent. The Square End Refreshment Tent can be used for many different purposes, such as church socials, lawn parties, etc. See page 6 for description of Repellant and Champion Brand Ducks.

This tent is very handy when parties wish to separate for a day or two. It can be separated and yet provide two complete tents. The above cut shows how they are set up either singly or as one tent. Sod Cloth can be put on the bottom of these tents at a small additional cost. See pages 68 and 69 for prices on sod cloth, mosquito proof doors, ventilators, asbestos rings, etc. For full description of Champion and Repellant Brand Ducks see page 6.

CHAMPION BRAND DUCK

6	7 x 7	7'	\$25.20	\$27.35	\$29.55	\$32.60	\$37.75	\$ 5.00
7	7 x 9 $\frac{1}{2}$	7'	29.85	32.35	35.10	38.65	44.90	5.50
8	9 $\frac{1}{2}$ x 9 $\frac{1}{2}$	8'	35.75	38.95	42.15	46.65	54.40	5.50
9	9 $\frac{1}{2}$ x 12	8'	41.75	45.60	49.45	54.80	64.00	6.00
10	9 $\frac{1}{2}$ x 14	8'	47.20	51.55	55.90	62.00	72.50	6.50

The shed tent is intended for use without a stove. By building a fire outside you get all the heat required. On a rainy day the awning can be drawn back over the roof to form a fly, thus keeping the tent perfectly dry. Mosquito netting may be sewn in the front of this tent at a small additional cost. For asbestos rings, ventilators fly doors, etc., see pages 68 and 69. For full description of Repellant and Champion Brand Ducks see page 6.

10	14 x 20	13x14x7½	14x14	10x10'8x10	41.75	49.75	57.75

The above serves the double purpose of a tarpaulin and pack-cloth which can be converted into various forms of tents. The practical way of rigging it is in a semi-pyramid style, which gives you a complete tent. All necessary ropes, etc., are attached to these paulins so they can be set up in the many different ways as shown in above cut. They fold compactly and take up little room in the pack and when not required as a tent will be found convenient for many uses around the camp. Being all hand roped these tents are made specially strong and durable. Poles being leather bound are a decided advantage, while bale rings and block and tackle with long guys add greatly to their value. For easy handling and convenience the larger tents are laced in sections so that they may be added to at anytime or reduced as the occasion demands.

This tent fills all the requirements of a motorist. It makes an ideal garage at a small outlay. It is a style of tent that is being used more and more every year, as motorists are finding out it does not pay to leave their cars out in all kinds of weather. The frame of this tent is strongly made so as to stand through any storm. All joints are connected with iron fittings for strength, which also makes the frame very easy to set up. From experience we have found it does not pay to supply a cheaper frame with these tents. Ours is the best make. See page 6 for description of Repellant and Champion Brand Ducks.

Our Auto Tourist Tent is a very practical and popular one, finding favour among Motorists generally. Can be used with either large or small cars, has flap which goes over top of car and fastens to wheels with ropes, also has a partition between car and tent, which makes it snug and weather-tight.

The above prices include the centre partition.

Ventilator windows \$3.00 each extra.

Steel pegs for the above tent \$3.00 a dozen extra.

## The Clear Space Tent

**Style 70**

In offering the above tent we have overcome every possible objection and perfected several new ideas. Note—There is no pole in the centre of tent, which gives a **CLEAR SPACE** making more **BED ROOM**, and the spread arms at front and back of the tent gives more **HEAD ROOM** than any other tent on the market.

Other additional features and several improvements are included in the following:—

1. Easily and quickly put up, and simple to take down.
2. Collapsible poles fold up 3'6" long, making them easy to pack.
3. Tent made of specially treated waterproof duck, colour Olive Drab or Khaki.
4. Bobbinet windows in the back with protecting flap.
5. Mosquito-proof door keeps out mosquitoes and flies.
6. We can supply tent with or without floor cloth.
7. Each tent, and poles are packed in separate bags.
8. Weight of tent, poles and floor cloth, 44 lbs. Weight of tent, without floor cloth, 34 lbs.

Made in one size only 7' x 12' x 3' having a 7' clearance.

Price for above tent complete with poles, pegs, tent bag and waterproof floor cloth, \$88.00.

Price for above tent complete with poles, pegs, tent bag, without floor cloth, \$76.00.

For real comfort a fly is necessary. It keeps your tent nice and cool during a hot sunny day and also keeps out all dampness during a heavy rain. People who know how to camp always use one. We have just listed a few sizes, but can make them to fit any size of tent. Our tent silk is of the finest quality, it is light in weight and at the same time strong and durable. We always carry a large stock of all grades, so no matter what your requirements are we can take care of them.

This is the classiest little tent made. Price includes waterproof floor cloth sewn on tent. It really is a pyramid tent requiring only one pole. But pole does not come up at the centre as in a regular Pyramid Tent. The front is perfectly perpendicular, allowing the pole to be set up outside the tent; this gives an entire clear space inside, as it can be set up by tying the guy rope to a branch of a tree. By setting it up in this manner no poles are necessary at all. It also has two ventilators, one over door, and one in wall at back. This gives a perfect ventilation. Try one on your next hunting or fishing trip.

The Silk Pyramid Tent is very roomy and comfortable and has the advantage of requiring only one pole to set it up. They also give the greatest amount of room for the minimum amount of material, making them very light to carry. All silk tents have cotton sod cloth sewn on bottom of wall. We use solid brass slides on guy ropes. These are very small and especially adapted for silk tents. For Mosquito-proof doors, asbestos rings, etc., see pages 68 and 69.

For lightness and compactness there is nothing to equal G.H.G. Silk tents. They are strong as well as light in weight. The wedge tent although not as roomy as the wall tent is an ideal tent for prospectors and hunters as it is so easily carried. All our silk tents are put up in neat duck bags to protect them from being torn in shipment and also to keep them clean. They are all fitted for outside poles so any kind of pole may be used. A mosquito proof door adds greatly to the comfort of these tents and very little to the weight. We pride ourselves in saying that we carry the best assortment of silk tent cloth in the Dominion. We are always glad to send samples of our different grades upon request.

This is another style of canoe tent. The poles are jointed, which enables one to pack the complete tent in a very small space. These tents are put up in a neat and strong bag which holds poles and pins as well. When it is necessary to do much portaging we recommend this style of tent as you get the greatest amount of floor space with the least amount of weight. See also page 53 for another style of canoe tent. For fly-proof doors, etc., see page 68.

## Preservo

### Water and Mildew Proofs Cotton Ducks

Easily applied — makes canvas waterproof and mildew proof leaving canvas soft and pliable—a real investment for the tent owner. When treated with Preservo canvas is easier to handle and its life is greatly lengthened. One gallon treats about 100 square feet.

Three shades — Colorless —  
Buff—Green.

One Gallon Cans—Price \$3.50.  
Five Gallon Cans—Price \$15.00.

## Water Buckets

A water bucket is not a luxury, it is a necessity. Why bother to lug around a wood or metal pail, when you can have the same service from a canvas bucket, and it does not take up any room.

We make a specialty of paulins. Our trade in this line is growing by leaps and bounds, because we know how to make them to give entire satisfaction. All our paulins are strongly reinforced at every tie rope, with heavy rope sewn in hem on all four sides. This rope gives double strength and makes them last twice as long. Our treated paulins are in a class by themselves. After years of experience we now have the finest waterproofing process on the American continent. It not only prevents them from leaking, but also prevents mildewing. Write us for samples. Don't take our word. See for yourself. This treatment is done by ourselves on our premises. Don't be deceived by a substitute. There is none other as good. Our Thistle Brand Flax Waterproof Paulin Cloth is so widely known it needs no introduction. For description of the above materials see page 6.

## Hand Fire Fighting Equipment

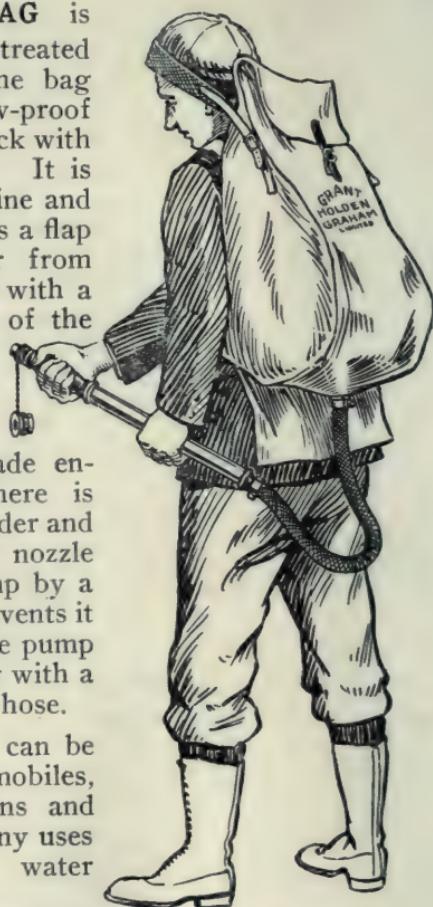

**T**HIS apparatus has become one of the most useful pieces of a Fire Ranger's equipment. It is used by them for controlling the outskirts of forest fires, for extinguishing grass and ground fires, putting out fires in the tops of trees. It throws a strong effective stream sixty-five feet, or when used with a spray nozzle a heavy stray twenty or thirty feet.

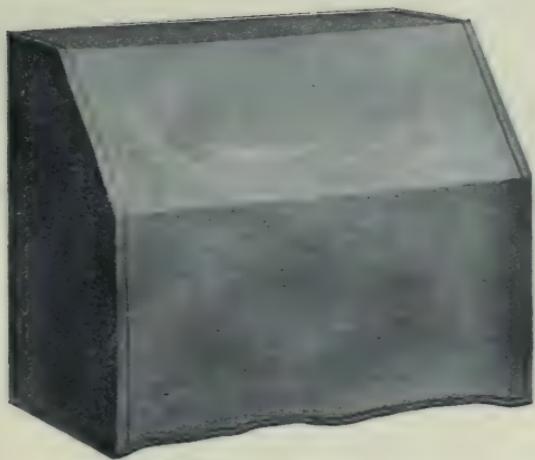

**THE WATER BAG** is made of a special treated linen, which makes the bag leak-proof and mildew-proof and it is lined on the back with a heavy treated duck. It is provided with a tumpline and shoulder straps and has a flap to prevent the water from splashing. It is fitted with a strainer on the inside of the bag to prevent dirt from getting into the pump.

**THE PUMP** is made entirely of brass. There is nothing to get out of order and nothing to rust. The nozzle is attached to the pump by a small chain, which prevents it from getting lost. The pump is connected to the bag with a strong flexible rubber hose.

The bag and pump can be used for washing automobiles, spraying trees, gardens and can be adapted for many uses where there is no water connection.

Does head where the Awning attaches set back or project more than pillars 8, 9, 10, 11, if so, how much? \_\_\_\_\_

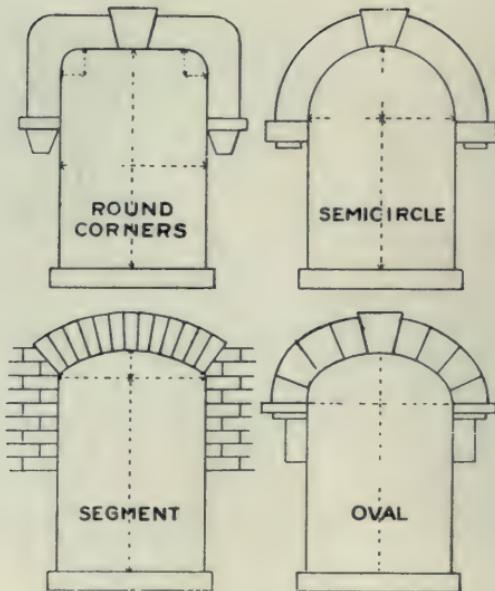

Are pillars 8, 9, 10 and 11 of wood, stone, or iron? \_\_\_\_\_

Is top where awning will attach of wood? \_\_\_\_\_

Give width of pillars 8 and 9 \_\_\_\_\_

For a Roller Awning give height you want crank box from sidewalk 6 to 7 \_\_\_\_\_

When irons are not required give the following measurements:  
 Head to bar, 1 to 3 \_\_\_\_\_ Extension, 3 to 4 \_\_\_\_\_  
 Front bar, 4 to 5 \_\_\_\_\_ Is front bar wood or Iron? \_\_\_\_\_

The above drawings show the different shaped tops of windows. In making out your order, be sure to state which style top your windows have, unless they are square cornered. On measuring, note carefully the dotted lines on these drawings, and give a measurement for each of them. It just takes a minute to draw a rough sketch of a window, and by so doing, may save you either delay or a misfitting awning. It is always the little details that cause a misfit. Don't be afraid to give too many details. When an awning does not fit properly we are more anxious to make it fit than you would be to have it done, as a good fitting awning is a splendid advertisement, but a poor fitting one cause us untold harm. As we want our goods to advertise themselves, you can rest assured we will not send you anything but what is properly made and finished. Write for samples of our latest stripe and prices.

## How to Honour the Flag

1. The only authorized flag for use on land, throughout the British Empire, is the UNION FLAG, commonly called the UNION JACK.

2. The UNION FLAG is the National Flag of Canada as of all other parts of His Majesty's Dominion, and may be flown by all British Subjects. (Canada Gazette, Vol. XLV., page 4574).

3. The Red Ensign, with the Arms of the Dominion of Canada in the fly, is intended to be used by Canadian Merchant vessels. (Canada Gazette, Vol. XLV., page 4574).

4. Ships owned by the Canadian Government Departments use the British Blue Ensign with the Canadian Coat of Arms in the fly.

5. Ships of the Royal Canadian fly at the stern, the British White Ensign, and at the bow, the Canadian Blue Ensign.

6. The Canadian Air Force is authorized to use the Royal Air Force Ensign, of which the following is the correct description:

"Light blue, in the dexter canton the Union and, in the centre of the fly of the flag three roundels superimposed, red upon white upon blue."

7. The flag should not be hoisted before sunrise, nor allowed to remain up after sunset.

8. In hoisting the flag, the broad white stripe in the cross of St. Andrew, should be next the mast head;—if reversed, it is an indication of distress.

9. It should never be used as a cover for table, box or desk, and nothing should be placed upon it.

10. When the UNION FLAG and other flags are displayed together as in street decorations, the UNION FLAG should fly to the NORTH on streets running East and West, and to the East on streets running North and South.

11. It should always be carried upright and never allowed to touch the ground.

12. When being placed at half-mast, the flag should first be raised to the mast head and then lowered.

13. For indoor decoration the flag may be caught up in many artistic fashions and used with bunting, garlands, etc., but it should never be below a person sitting.

14. When the flag is used at the unveiling of a statue or tablet, it should not be allowed to fall to the ground, but should be raised and allowed to wave, forming a feature of the ceremony.

15. When troops with uncased Colours are passing, spectators should stand at attention, and all male British Subjects should raise their hats.

16. Whenever the NATIONAL ANTHEM is played or sung, all persons within hearing should stand at attention, men with heads uncovered.

**NOTE**—The "JACK" is a flag to be flown only on the "JACK" staff i.e., a staff on the bowsprit of forepart of the ship. It is believed "JACK" is derived from the abbreviated name of the reigning Sovereign, King James I., under whose direction the flag was constructed, and who signed his name "JACQUES."

### The Slumber Robe For Tourist and Camper

We are making the above robe to meet a growing demand from Auto Tourists and Campers for something warmer and lighter than the ordinary wool blanket. This robe is much warmer than two pairs of wool blankets and the weight of the robe is no heavier than one pair of blankets. The interior of the robe is made up of sheets of pure wool encased in a cotton cover and tufted so that the wool will not shift or get lumpy. It is then covered with a light khaki drill.

**Made in two sizes for single and double cots**

#### **"POLAR" SLEEPING ROBES**

Snug and cosy for the night. Thousands of Polar Sleeping Robes are being used to-night and every night just as you see this one, in every quarter of the globe.

#### "POLAR" SLEEPING ROBES

In Arctic climes a favorite way to sleep is by screening off the head with a large tarpaulin and roll up in Polar Sleeping Robe, then burrow down in the deep snow.

Cross section of above Polar Sleeping Robe. Interlining made of a nice quality of fine white cambric carefully sewn in triangular shaped tubes into which the down is mechanically blown. Outside of shell is of an 8 ounce Khaki Shelter Tent Duck Waterproofed and noted for its durability and lasting wear. Robe is lined with pure wool English Kersey.

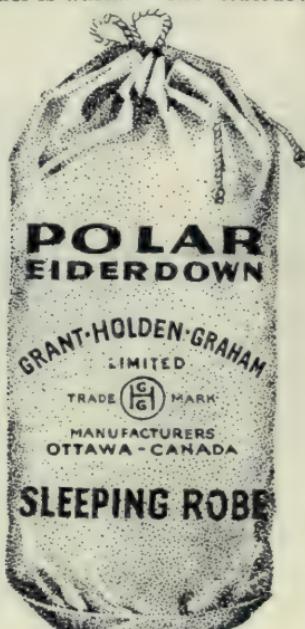

Here is a section of Interchangeable Polar Robe with four different inside sections—in sets of two each covered with fine quality sail silk encased in a waterproof Khaki Sail Silk Slip and tied in with tape fasteners. Six pieces in all. This makes the robe exceptionally light in weight for portaging or packing. Can be taken out for airing.

#### "POLAR" INTERCHANGEABLE SLEEPING ROBES

Interchangeable Polar Sleeping Robe can be turned inside out as shown in illustration. This allows airing which gives buoyance and warmth and permits using one layer only for covering when weather is warm.

Illustration as above—shows how easily the Interchangeable Polar Sleeping Robe can be separated. Interchangeable Robe is composed of two separate duck casings each containing two eiderdown sections.

Above illustration shows robe ready for shipping done up in bag. Also gives idea of size when folded up ready for carrying.

## "Durabil" Mackinaw

Only the pure Canadian Fleece Wool is used in the making up of our celebrated "Durabil" Mackinaw—a guaranteed protection most needed by those living in our Canadian climate. Nature makes wool repellent and water-proof. Converting wool into mackinaw such as our "Durabil" cloth is a secret which has been worked out by experts with years of experience. We claim our mackinaws are superior to other makes. First, because our cloth leads in quality; secondly, because our garments are designed to give them a smart, natty appearance, and thirdly, because they are properly tailored. To justify this claim we have but only to point out the way our business has grown since first introducing mackinaw to the Canadian trade.

Thousands are now wearing "Durabil" Mackinaw Suits and every garment is guaranteed.
